

Project 1: Cloud-Based Student Management System

Overview:

A cloud-based system where students can register, log in, manage courses, and track progress.

Technologies:

Microsoft Azure, Node.js/Python, Azure SQL Database, Blob Storage

Features:

- Student Login & Dashboard
- Admin Panel
- File Upload System
- Role-Based Access

Learning Outcomes:

- SaaS Application Development
- Cloud Deployment
- Authentication & Database Integration

Project 2: Scalable E-Commerce Platform

Overview:

A cloud-based e-commerce system capable of handling high traffic using load balancing.

Technologies:

Microsoft Azure, Virtual Machines, Load Balancer, Cosmos DB

Features:

- Product Listing
- Add to Cart
- Payment Simulation
- Auto Scaling System

Learning Outcomes:

- High Availability Architecture
- Load Balancing & Scaling
- Real-world Deployment
